Sir:

In response to the Office Action dated August 9, 2002, please amend the above  
identified application as follows:

IN THE CLAIMS:

Please enter the following amended claims:

19. (Once Amended) A mail processing system comprising a web server operable to  
send a predetermined program to a terminal based on a request from the terminal; and a mail  
server operable to send a mail having a recipient mail address of an intended recipient to a  
server that receives and stores the mail, wherein the mail server includes:

an advertisement information memory operable to detect advertisement information to  
be added to the mail from the advertisement information memory based on at least one of: (a)  
user information about a user having the recipient mail address, (b) user information about a  
user having a sender mail address corresponding to a sender of the mail, and (c) a portion of a  
message in the mail ;
